

Welcome to MyIndici

Indici is a patient management system used by your General Practice (GP) to keep track of your health information and where your health care professionals can update your patient records in real time.

MyIndici provides access to your health information at your fingertips. Similar to internet banking, your health information is securely protected. Only you can access your health information using MyIndici.

At any time, from any device, you can track your health progress online and get reliable health information including:

Book and cancel appointments	Update your contact information
Request repeat prescriptions	View lab reports
Receive secure messages from your health team	Check your account balance
View resources your health team has picked out for you	

TO REGISTER: Just let your GP team know you want to use MyIndici or sign up via the website (see below) and you'll be sent an email with the access details.

Each patient requires a separate email address and must be 16 years of age or over. The details you register with must match the information in the database at your health centre for your registration to be activated.

Once your GP has verified who you are, you will be able to log in to MyIndici from:

Mobile app - download the **MyIndici 2.0** app to your smartphone through the App Store or Google Play; or

Computer browser – go to wcdhb.myindici.co.nz/login

To register for MyIndici, go to www.wcdhb.health.nz/myindici
