

# West Coast Health Facilities Redevelopment Update

West Coast District Health Board

April 2017

Composite floor decking

## Noise

We know the work we are doing is at times noisy and we apologise for that. Contractors will be installing the composite floor decking and this process can be noisy as the sheets are moved across the steelwork and fixed down. A lot of the noise impact will depend on which way the wind is blowing.

## Steel

The project is tracking along as planned and the erection of the structural steel has been a significant project milestone. The North Wing structural steel, roof steel and purlins are complete and the facade steel has commenced - it shows off the shape of the building nicely.

## Parking

Over the next year there will be some phased changes to the car parking on site as staged works within the existing hospital grounds will result in parking closures on the campus. Please look out for signage indicating where patient and visitor car parking is located.

## Milestones

- |   |        |
|---|--------|
| ▪ Southern wing structural steel installation | April  |
| ▪ Roofing first stage                         | June   |
| ▪ Timber framing commencement                 | July   |
| ▪ Aluminium strip windows commencement        | August |

## Tell us about the new Grey Base health facility

- Excellent secondary care
- Fit for purpose, modern design allows for integrated health care
- \$77.8 million facility
- 8,500 square metre
- 56 in-patient beds
- Three operating theatres

An aspirational drawing of the courtyard area

As our priority for funding is to provide the best clinical environment for successful rural healthcare, there are items that local businesses and service groups can assist with funding. Please contact the Project Team if you are interested in hearing about those opportunities.

## Keep track of us
