Improved access to elective surgery

The target is an increase in the volume of elective surgery by an average of 4000 discharges per year. DHBs planned to deliver 93,980 discharges for the year to date, and have delivered 4,890 more. The new revised target definition includes elective and arranged in-patient surgical discharges, regardless of whether they are discharged from a surgical or non-surgical speciality (excluding maternity).

100%

Faster cancer treatment

The target is 85 percent of patients receive their first cancer treatment (or other management) within 62 days of being referred with a high suspicion of cancer and a need to be seen within two weeks by July 2016, increasing to 90 percent by June 2017. Results cover those patients who received their first cancer treatment between July and December 2015.

Increased Immunisation

The national immunisation target is 95 percent of eight-month-olds have their primary course of immunisation at six weeks, three months and five months on time. This quarterly progress result includes children who turned eight-months between October and December 2015 and who were fully immunised at that stage.
